

KELVIN ALMONTE

SOFTWARE ENGINEER

Summary

Self-motivated and hardworking software engineer looking to work in a challenging environment to utilize my skills and knowledge to work for the growth of the company. Strong work ethic in team and individual to drive product success. Able to grasp new concepts quickly and efficiently.

Projects

Virtual GBooks

Apr. 2020

Demo: <https://virtualgbooks.herokuapp.com>

GitHub: <https://github.com/kalmontee/windex>

A full-stack React app based on searching for any books and saving them to your list of favorites.

- Developed with React, React-Router, CSS Modules, NodeJS, Express, Mongoose, & Axios.
- Implemented Google Books API to fetched data for any specific book the user requests.
- Polished a solid UI with a loading spinner and mobile responsive.

Fair Space

Mar. 2020

Demo: <https://fairspace.herokuapp.com>

GitHub: <https://github.com/kalmontee/chicons>

A full-stack apartment listing web app offering renters access to information on available units for rent posted directly by landlords themselves.

- Developed with React, React-Router, NodeJS, Express, MongoDB, Firebase, CSS, SASS, GreenSock, Axios, Google Maps & Google Geocoding APIs.
- Integrated the latitude and longitude from Rent Estimate with Google Maps to have the same exact results from both APIs.
- Built the authentication features and contributed to the UI.

Dev Seek

Jan. 2020

Demo: <https://devseek.herokuapp.com>

GitHub: <https://github.com/kalmontee/reclass>

A full-stack application that allows job seekers to search and apply for web development jobs and allows potential employers to post any web development openings they wish to fill.

- Developed with HTML, CSS, Bootstrap, JavaScript, jQuery, NodeJS, Express, Moment.js, & MySQL
- Built an algorithm for searching specific keywords ending with 'engineer' and 'developer' that will display all the jobs available.
- Established a mobile responsive design, contributed to the UI, and improved speed performance.
